CAREER OBJECTIVES:

I wish to solve challenging problems, continue to learn, and build amazing things.

WORK EXPERIENCE:

DIRECTOR OF BLOCKCHAIN DEVELOPMENT for Figure Technologies Inc. From November 2025 until current.

Technical lead over Provenance Blockchain's core protocol. Manage a team to build and maintain the Provenance Blockchain. Collaborate with the Cosmos-SDK community. Coordinate features and fixes with others (including outside parties) in order to plan and release new versions.

PRINCIPAL STAFF SOFTWARE ENGINEER for Figure Technologies Inc. from March 2023 until October 2025.

Technical lead over Provenance Blockchain's core protocol (employed by Provenance from March 2023 until November 2024 with same role). Build and maintain the Provenance Blockchain utilizing Go, Protobuf, and Cosmos-SDK. Collaborate with the Cosmos-SDK community. Coordinate features and fixes with others (including outside parties) in order to plan and release new versions.

STAFF SOFTWARE ENGINEER for Provenance Blockchain Foundation (split off from Figure Technologies Inc. in

July 2022) from September 2020 until March 2023. Build and maintain the Provenance Blockchain utilizing Go, Cosmos-SDK, and Tendermint. Maintain some aspects of the Cosmos-SDK. Work GitHub profile: [dwedul-figure](#).

SENIOR SOFTWARE ENGINEER and LEAD for Social Finance Inc. (SoFi) from March 2016 until September 2020.

Lead the underwriting team. Build and maintain java services primarily dealing with underwriting. Utilize HTML/CSS/Scala/Javascript/React/Jquery/AJAX for front-end interaction. Utilize REST APIs written in Java. Use Hibernate or jOOQ to interact with MySQL and PostgreSQL databases. Use Spring for dependency injection. Use either Spring Boot or the Play Framework to wrap it all together. Build things using either Gradle or SBT.

ASSOCIATE MANAGER – ENGINEERING for Social Finance Inc. (SoFi) from July 2018 until March 2019. Oversee the Underwriting engineering team of 7 engineers, and 3 QA personnel. Be the primary point of contact for anything involving underwriting. Manage bug fixes, change requests, and new feature additions. Interact with other teams to plan out collaborations and needs. Develop and drive a clear picture for the underwriting service. Help implement requests when resources are limited. Participate in architectural decisions at a company level.

EDUCATION:

BS, Combined degree in Computer Science/Mathematical Science University of Montana, Dec 2003

BA, Computational Physics, University of Montana, Dec 2003

SKILLS:

Logical, deductive reasoning and problem solving

Languages, Markups, and frameworks:

Go, Bash, Protocol Buffers, Java, Kotlin, C#, Perl, Javascript, C, C++, Visual Basic, Fortran, JSON, XML, HTML, CSS, JQuery, Twitter Bootstrap, Spring, Ninject, JPA/Hibernate, jOOQ, Entity Framework, Kafka, Redis, REST, SOAP, gRPC, GraphQL, Play, Spring-boot, MVC.net, Postgresql, SQL Server, Oracle, MYSQL, DynamoDB, Gradle, Cosmos-SDK, Tendermint, Github Actions

Familiar Topics:

Blockchain Operation, Microservice Architecture, Test driven development, Dependency Injection, Stream Processing, MVC Design Pattern, Continuous Integration, Continuous Deployment, Logging/Reporting/Diagnostics, Technical Documentation, Software Release Lifecycle

Thank you for your time.
